Trabajo fin de master

Celia Sifre Armengol

Base de datos

Base de datos con los años 2013, 2014 y 2015 con las capturas de Thanasimus formicarius y las capturas de los escolítidos de interés.

Tabla descriptiva de los datos:

```

##
## For each parameter, n.eff is a crude measure of effective sample size,
## and Rhat is the potential scale reduction factor (at convergence, Rhat=1).
##
## DIC info (using the rule, pD = Dbar-Dhat)
## pD = 46.4 and DIC = 14077.0
## DIC is an estimate of expected predictive error (lower deviance is better).
```

##
## For each parameter, n.eff is a crude measure of effective sample size,
## and Rhat is the potential scale reduction factor (at convergence, Rhat=1).
##
## DIC info (using the rule, pD = Dbar-Dhat)
## pD = 49.7 and DIC = 12078.1
## DIC is an estimate of expected predictive error (lower deviance is better).
```

##
## For each parameter, n.eff is a crude measure of effective sample size,
## and Rhat is the potential scale reduction factor (at convergence, Rhat=1).
##
## DIC info (using the rule, pD = Dbar-Dhat)
## pD = 17.1 and DIC = 15950.0
## DIC is an estimate of expected predictive error (lower deviance is better).

##
## For each parameter, n.eff is a crude measure of effective sample size,
## and Rhat is the potential scale reduction factor (at convergence, Rhat=1).
##
## DIC info (using the rule, pD = Dbar-Dhat)
## pD = 17.5 and DIC = 19803.8
## DIC is an estimate of expected predictive error (lower deviance is better).

##
## For each parameter, n.eff is a crude measure of effective sample size,
## and Rhat is the potential scale reduction factor (at convergence, Rhat=1).
##
## DIC info (using the rule, pD = Dbar-Dhat)
## pD = 17.8 and DIC = 15320.1
## DIC is an estimate of expected predictive error (lower deviance is better).
